PASSION & PERSEVERANCE

As an entrepreneur, I realized that most of the objectives I wanted to complete required a lot of time. To me doing business is like sailing; there is no right or wrong path, you must plan your route day by day. Have a destination, but also know that it changes over time. Keeping this in mind, I now understand that my destination is not just the business, but making it a personal goal to always throw my heart over obstacles and have the perseverance to move forward.

CHIAPPA FIREARMS began in 1958, when Ezechiele (Oscar) Chiappa opened his company and called it Armi Sport. Initially an artisanal workshop, the company has grown to become an industrial group, still entirely owned by the Chiappa family.

Chiappa brands now include Chiappa Firearms S.r.l. (defense, sporting and replica firearms), Kimar (blank and signal guns), Costa S.r.l. (surface treatment of metals) and Chiappa Firearms USA, Ltd. (USA distribution center).

Chiappa Firearms' wide range of products include replicas of American historical weapons and muzzleloaders, lever action shotguns and rifles, handguns and rifles in .17 and .22 rimfire, sporting and self defense handguns such as the famous Rhino, signal guns and air guns. As a direct result of the optimization of the manufacturing process, all Chiappa products are an excellent value. Chiappa Firearms is a rapidly developing, constantly evolving company with a great capacity to innovate with flexibility and dynamism, allowing Chiappa Firearms to spread sales in 62 countries, capable of competing with the biggest companies in the world.

PERSONAL DEFENSE WEAPON

RIFLES & PISTOLS **CBR-9 PDW**

Engineered to meet and improve today's standards for personal defense firearms, the 9mm CBR-9 Black Rhino semi-automatic pistol is a powerhouse of high technology and design. A fully ambidextrous and highly configurable platform, the CBR-9 Black Rhino can tackle modern-day challenges head on.

CBR-9

The Personal Defense Weapon Unlike Anything You've Ever Seen

Originally designed as a PDW (Personal Defense Weapon), the CBR-9 Black Rhino is an original project with original solutions and several patents contributing to make it new and different. This semi-automatic pistol adopts an improved and efficient blowback system, with a bolt that is half the weight of competitors' products. Thanks to its original design, all mechanical components are placed in the upper receiver, while the lower receiver is just the grip, the polymer frame of the pistol. Within the bolt mechanism, the hammer mass cooperates to the closure in a substantial manner, thanks to its high mass and inertial increment obtained

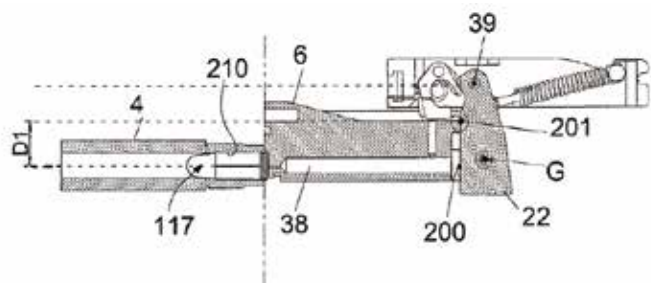

by the particular way the hammer and the bolt interlock with one another. Along with the particular hammer and bolt mechanical interaction, the low axis barrel design of the CBR-9 Black Rhino contributes significantly to an almost inexistent muzzle flip up. The efficient flash hider visibly reduces flames. It's important to note that the CBR-9 can be field stripped easily, without any tools. As a matter of fact, the CBR-9 Black Rhino has many features that cannot be compared with any other PDW firearm on the market, granting optimal controllability and precision shooting even to people with little to no training.

Four Reversible Features w/ Ambidextrous Bolt Release

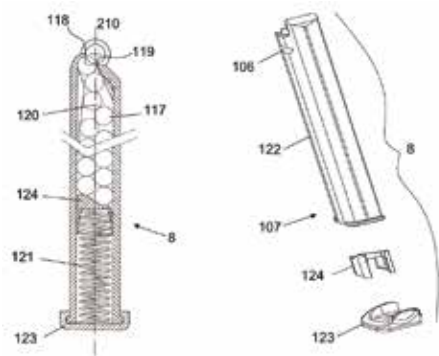

Patented Blowback Closing System

We have significantly stabilized the pistol by exploiting the recoil kinetic energy of the bolt. This is achieved by using a lighter than usual bolt and a heavier than usual hammer. The hammer has a center of mass positioned below the point of impact with the bolt, this amplifies the length of the movement of the center of mass of the hammer compared to the bolt.

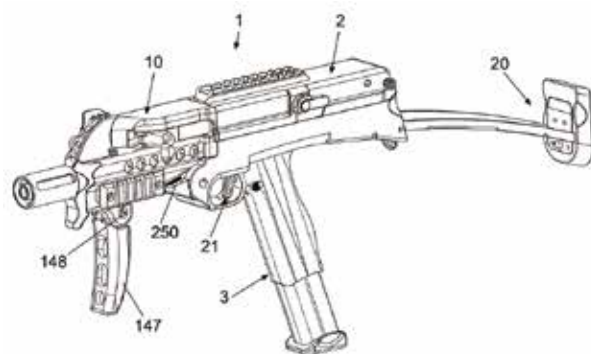

Patented Magazine:

This unique proprietary double stack magazine has an asymmetrical placement of its retaining lips such as to offset the presentation of the cartridge. This added to some redesigned internal walls contributes to reducing the pressure on the presenting round, granting continuous feeding even with lips deformation up to 2.5mm

Patented Extended Stock:

This design allows for the stock to be completely hidden within the gun when closed and opening with curved guides to be in a lower position once open. The stock never interferes with the forearm leaving the shooter to be able to handle the pistol freely with one or two hands. Thanks to its improved stability can be held faster with no shoulder placement needed.

FEATURES

- A. Flash Hider
- B. Reversible Cocking Lever
- C. Sling Swivel Point
- D. Accessory Rails (Both Sides)
- E. Hinged Fore Grip *
- F. Fiber Optic Sights
- G. Ambi. Bolt Release
- H. Trigger Safety

- I. Reversible Mag Release
- J. (2) 18 Round Mags *
- K. Slim Profile Grip
- L. Reversible Fire-Safety
- M. MIL-STD 1913 Full Length Rail
- N. Reversible Sling Swivel/ Disassembly Bolt
- O. Sliding Stock *

* Features Not Available On USA Model. Magazine Capacity Depends On Local/Country Laws

RHINOS

The Rhino is the most innovative development in revolver technology in decades, if not since the creation of the revolver itself. Refusing to be constrained by tradition and previous design limitations, the Rhino has improvements that move the revolver forward into the 21st century.

Unconventional in appearance and superior by performance, the Rhino fires from the bottom of the cylinder rather than the top. This dramatically reduces muzzle rise and recoil felt by lowering the axis of the bore almost to the palm of the shooter's hand.

AMERICAN CLASSICS

RIFLES & REVOLVERS **LA322 & SAA**

Owning and shooting these American classics has never been easier... or more enjoyable! The LA322 lever-action rimfire rifle is now available in four versions that strip down easily in two parts for transport. The SAA 1873 revolvers are just as fun to shoot with. Models available with dual cylinders.

The LA322 Embodies What Americans Want In A Lever-Action Rifle

The lever-action 22LR is an American classic. Chiappa continues this legacy by using modern technology and materials to produce the LA322. This beautiful rimfire is as attractive as it is functional. Accurate, quick handling and rapid shooting,

A Timeless Handgun &
A Symbol Of The American West

MODELED AFTER THE GREATS

RIFLES & PISTOLS **M1 & 1911**

The Chiappa M1 semi-auto carbine and 1911-22 semi-automatic pistol offer the look and feel of great classics in a easy to shoot package. The M1 carbines are available with wood or black synthetic stocks, while the new M1-9 MBR has a black textured stock. 1911-22 pistols are available in variants including compact and railed models.

M1 NSR & M1 MBR

NEW! 500.250

NEW! 500.259

Modeled After One of America's Great Military Arms

These handy easy to shoot rifles have the same overall dimensions, trigger group design and sights as the original, but are chambered in the affordable .22LR or 9MM. The receivers have a dovetail machined on top of the front and rear receiver rings. The straight blowback design makes them ultra-reliable and easy to clean and maintain.

The M1-9 NSR & MBR Models Assert Their Dominance With A Strikingly Dark Tactical Display

TACTICAL RIMFIRE REPLICAS

& M4 UPPERS **MFOUR-22**

The AR-15 is the quintessential utility and sporting rifle of our times and Chiappa MFOUR-22 is a highly popular .22LR caliber iteration of the design. The MFOUR-22 is compatible with many MIL-SPEC components, and the M4-22 upper is available as a stand-alone, drop-in caliber conversion for MIL-SPEC lowers.

REPEATING SHOTGUNS

SHOTGUNS **1887 LEVER**

The legend lives on! Designed by John Moses Browning, the 1887 lever-action shotgun is made available by Chiappa Firearms in popular variants with walnut or rubber-coated furniture, including 18.5" barrel versions with pistol grip and a fast-load model for Cowboy Action Shooting.

1887 LEVER

Designed By: **John M. Browning**

The 1887 Lever-Action Shotgun Is Considered To Be The First Successful Repeating Shotgun

The Fast Load Model Is Great For Cowboy Action Shooting

The Chiappa Firearms' 1887 is a faithful reproduction of this classic firearm. The 1887 utilizes the design of the original solid lever that includes an innovative internal safety. Featuring a European walnut stock and forearm and color case finished receivers, the 1887 is as beautiful as it is functional. The 1887 T-Model offers a different look with its black "soft touch" rubber coated stock and forearm,

Cowboy Action Shooters are required to shoot with no more than two rounds in the shotgun. The fast load system allows the shooter to simultaneously load two rounds. Faster than side by sides/pumps.

Chiappa Firearms' 1892 is a true reproduction and manufactures models to suit anyone's need; from the classic 1892 Take Down Rifle with an octagonal barrel to the modern performance oriented, hard chromed 1892 Alaskan, to the Mare's Leg made famous by Hollywood. With all parts being interchangeable with an original 1892. Metal parts are precision made on modern CNC equipment, while the beautiful wood stocks are hand finished and crafted for a perfect metal to wood fit.

CLASSIC LEVER-ACTIONS

RIFLES **1886 LEVER**

Tradition meets technology: Chiappa manufactures its 1886 lever-action rifles on CNC machines to ensure quality and reliability in any sport shooting situation. The Chiappa 1886 lever-action rifle is available in classic finishes and modern design variants to meet the needs of today's demanding hunters.

1886 LEVER

Designed By: **John M. Browning**

Chiappa Firearms keep the performance and nostalgia alive and well with their accurate reproduction of the classic John M. Browning design. For nostalgic hunting or cowboy type shooting, the 1886 Classic Carbine or Standard Rifle are perfect with their traditional finishes and stocks.

Beautiful Color Case Hardening
w/ Oil Finished Walnut Stocks

Chiappa Firearms Makes Spencer Rifles In The Original
56-50 Or In The More Easily Obtained 45 Colt

Tube Magazine Inside
The Buttstock

The Spencer Rifle Gained Fame After...

Being adopted by the Union Army during the American Civil War. A manually operated lever-action fed from a tube magazine in the buttstock, the Spencer rifle was a vast improvement over the muzzleloading rifles being used during the war. Chiappa Firearms reproduction is manufactured from precision CNC parts precisely joined to beautiful, hand oiled walnut stocks. Color case finish receivers are joined to precision rifle barrels with a blued finish.

On The Plains & High Deserts Of The American West & In Hollywood

910.014

Chiappa Firearms' Sharps rifles capture the true craftsmanship and nostalgia of the original design with modern manufacturing. All metal parts are CNC machined for precision performance and target grade accuracy. The color case finished receivers are mated to classic octagonal barrels. Beautiful walnut stocks are finished and fit by hand to each barreled action by craftsman for true custom rifle performance, appearance and quality. The Sporting and Business models feature octagonal barrels and double set triggers while the Infantry, Cavalry and Carbine models feature round barrels and single triggers.

AG92

The Look & Feel Of The Beretta® 92 In An Easy Shooting CO₂ Powered Air Gun.

Shoot Up To 14 Shots w/ Dual Cylinders

Powered By Two CO₂ Canisters

Powered by two CO₂ canisters, the AG92 fires .177cal pellets at 330 fps (100m/s) The dual cylinders provide twice the shooting time. Pellets are fired from 7 round cylinders that can be quickly and easily loaded into the air pistol.

L.T.J. Alfa 1.50

A Familiar Design & The Reliability Of CO₂ Power

your home, your protection

Heavy & Hard Rubber Balls Available In 500, 100 & 50 Pieces

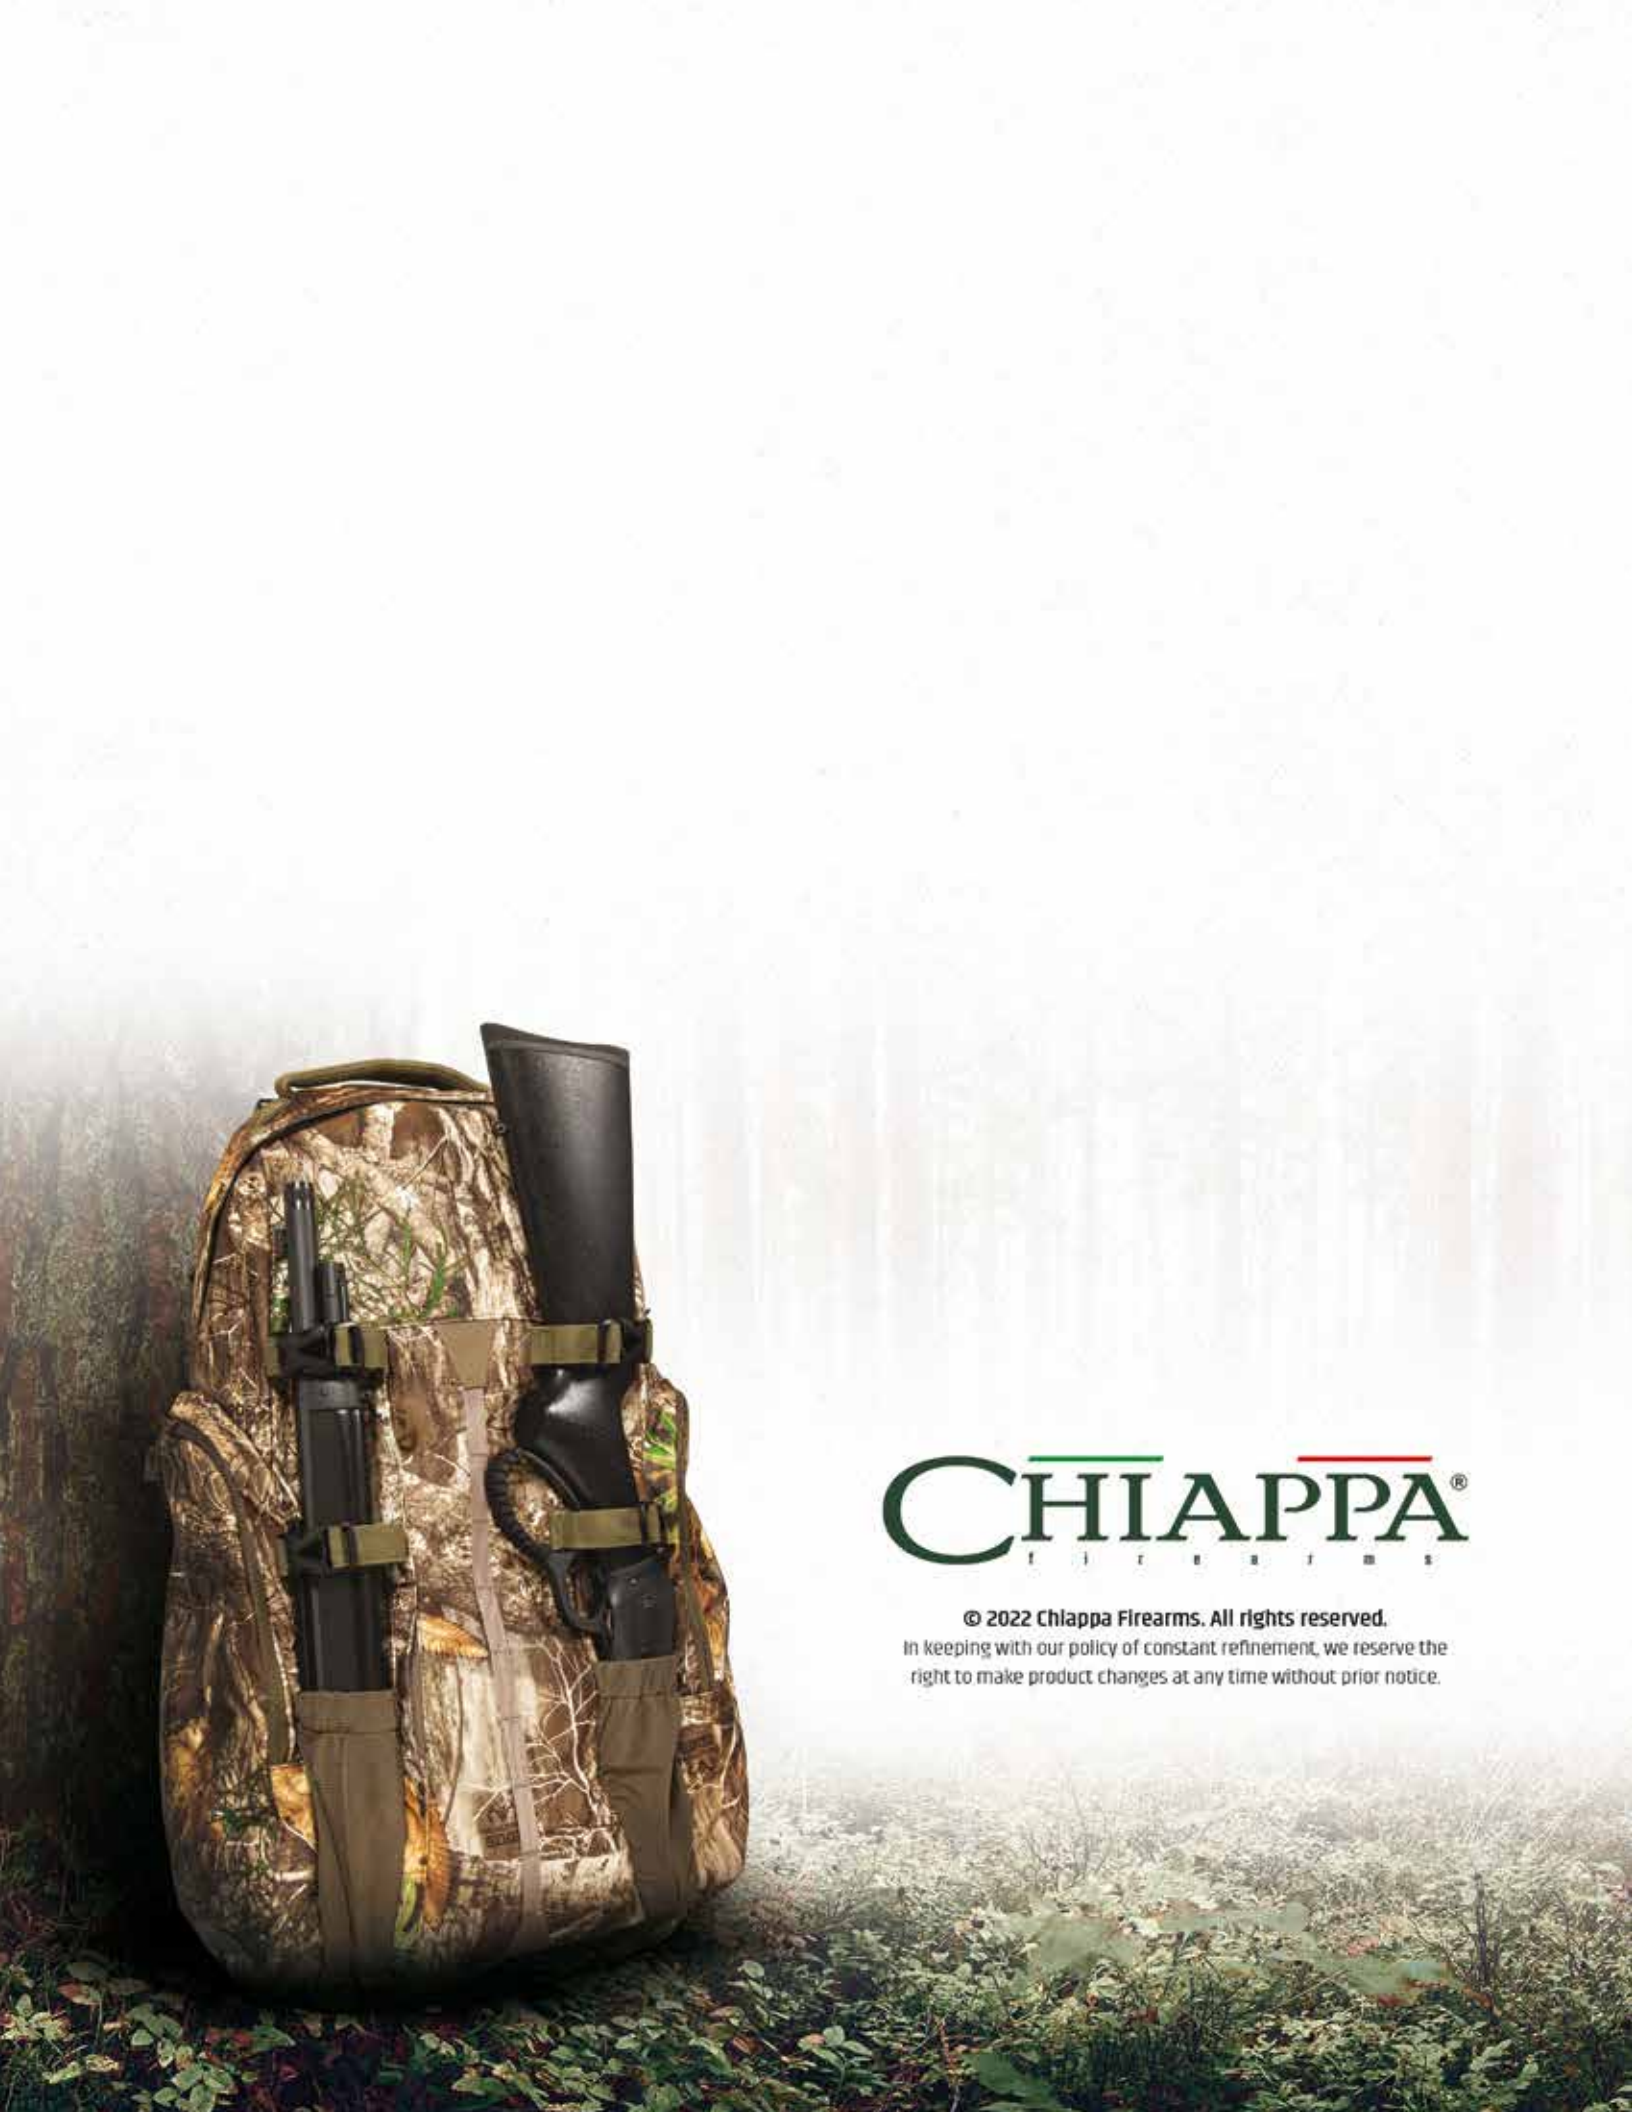

A Product Entirely Made In Italy

The LTL Alfa 1.50 is a rubber bullet gun that comes from the clever combination of a familiar design and the reliability of CO₂ power. The weapon employs non-lethal spherical hard rubber bullets in .50 caliber, with a seven-round magazine capacity and manual loading. Air propulsion is achieved through a standard 12-gram CO₂ cartridge, housed inside the grip.

Due to its ease of use and design, the LTL alpha 1.50 allows the user to quickly become familiar with the weapon, reducing training time. These features, together with its solid structure, lightweight and non-lethal ammunition make it a reliable, safe and easy to use gun, suitable for home defense and training simulations for public and private security personnel.
